Pursuant to authority delegated by the Commissioner of Patents under 35 USC 121, restriction is hereby required between the distinct inventions claimed in the present application and identified as follows:

- I. Claims 1-~~23~~, directed to a catalytic system.
- II. Claims 24-30, directed to a method for carboxylation.

The above inventions are regarded as distinct because they are separate entities and/or they are patentable in view of each other.

It is to be noted that Congress has provided the Commissioner with discretion in 35 USC 121 to restrict the application to one of two or more distinct inventions recited in one claim vis-a-vis two or more distinct inventions recited in more than one claim. Accordingly, applicant is required to limit the application to one of the above distinct inventions.

A telephone call was made to Bruce D. Gray on 19 July 1996 to request an oral election to the above restriction requirement, but did not result in an election being made.

To be complete, applicants response must include a provisional election even though the requirement is traverse.
